OPTIMISING THE EFFECTIVENESS OF THE B2B COMMUNICATION AND THE MANAGEMENT OF COMPLEX DOSSIERS

CONCERNS

Public administrations need to establish an end-to-end communication with their entities and the industry for the enforcement of new regulations or changes in a regulation. Stakeholders each have their own priorities.

CHALLENGES

Enforcing a new regulation needs to be done while improving competitiveness of the EU industry and keeping costs minimal for the administrations. A common approach and solution should be found by aligning all parties.

SOLUTION

Our solution enables a smooth exchange of information between the European Commission, the Member States and the industry. Components of our solution include the clear definition of data exchange protocols, the use of reusable, secure architectures and components. An example is our reusable workflow component controlling the key processes of Registration, Evaluation and Authorisation. It is currently used by many customers in the context of medicines, chemicals, food additives, or genetically modified organisms.

Definition of data exchange formats

- Based on international standards
- Designed towards change
- Assuring authenticity (digital signature)
- Optimising Administrations-to-Business (A2B) and Business-to-Administrations (B2A) communication

Implementation of REA Case Management System

- Centralised or decentralised architecture
- Flexible workflow support
- Secure access to information
- Online and offline options

FROM REGULATION TO PROJECT OPERATION

Specification and architecture

- On-site information gathering
- Design fully in line with the regulation
- Compliant to EC enterprise framework
- Open data and message format

Roll-out

- Progressive roll-out according to predefined priorities

Implementation

- Based on open source reusable components
- Cost-effective nearshore center in Greece
- Standard information exchange format

One stop shopping

- Design, implementation, maintenance and hosting services

TANGIBLE BENEFITS

- Increased efficiency and credibility, clear file status and fast access to data
- System fully in line with the regulation

REGISTRATION, EVALUATION & AUTHORISATION (REA)

Our solution is based upon a 'one-stop-shop' approach to a comprehensive IT system, defining system requirements in line with and an architecture that is open to be be implemented at various levels, such as European administrations, local governments and industrial companies. Based on data exchange standards and a flexible workflow engine, the system is designed to support technological, organisational and regulatory changes.

WHY OUR CUSTOMERS WORK WITH US

One Stop Shopping
Offering system specification based on the regulation, architecture, definition, development, roll-out and support.
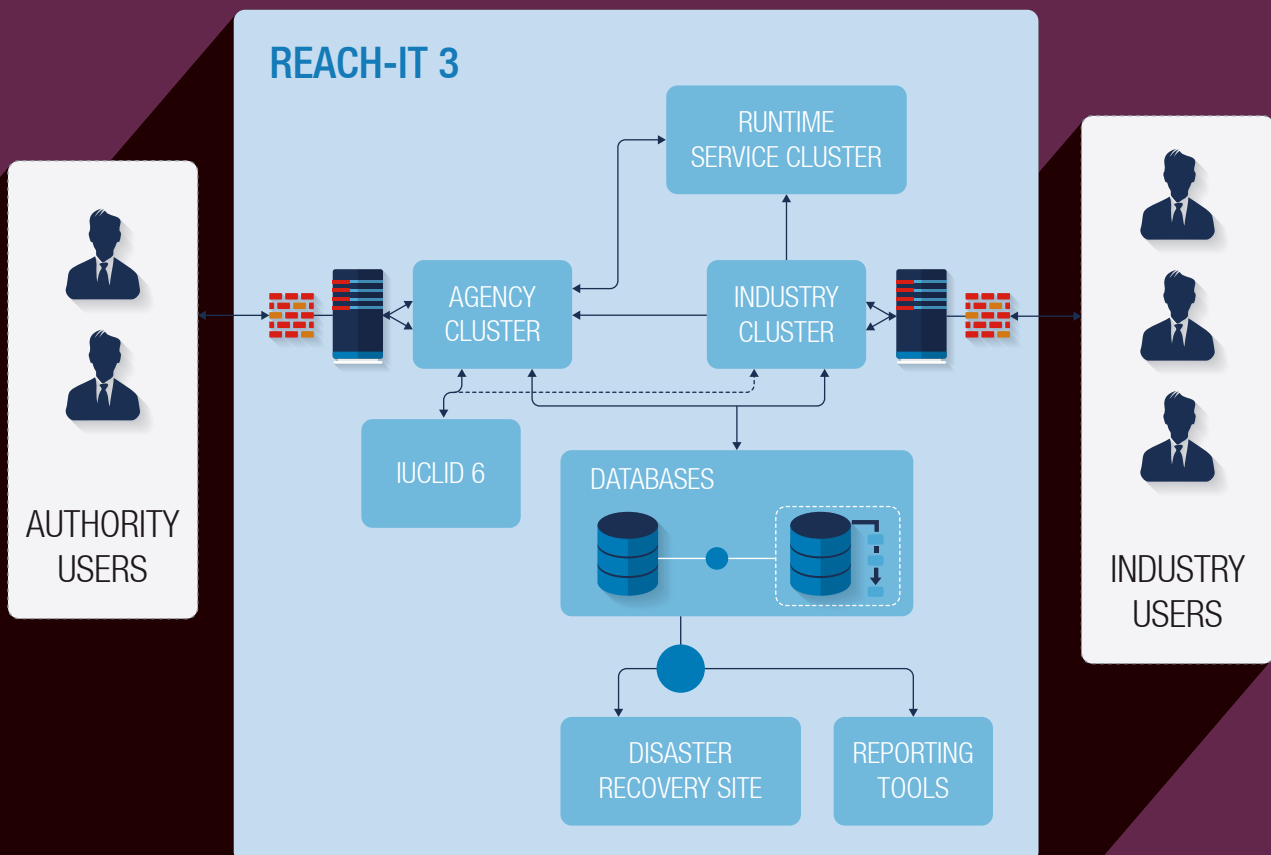

Efficiency & effectiveness
Leveraging reusable components into a solution design that facilitates day-to-day work.

Expertise
Similar challenges for peers have been solved before (REACH, KYOTO, EMA, OHIM, eGovernment).
